Getting started

- Clone the repo
- In main folder "npm install"
- "cd frontend" -> "npm install"
- Back to main folder
- "npm run dev" , this will start the react app and node server
- You can run client or server just look at package.json
- Client runs on port 3000
- Server runs on port 5000
- You can test the sample API by putting "http://localhost:5000/toppings" in browser or postman
- React main components are in src
- Watch this video https://www.youtube.com/watch?v=ldYcgPKEZC8
- The github repo for the video is in the description
-
