SCRUM Meeting 7 for Team Alpha Spin N' Stonasite
Prepared by: Joshua Rummell
Meeting Date: 4/19/23 - 8:10 AM

Meeting Attendees

1. Chase Albright
2. Jeremy Bui
3. Nathaniel Fernandes
4. Joshua Rummell

Meeting Agenda Items

- Google Integration - Where to best situate Google Map location of Spin N' Stone restaurant and how to make all text compatible with existing Google Translate features
- Debugging customer logic - ensuring that each order submitted is registered on the manager side inventory, decrementing each item in an order by one for each transaction

Status Update Since Last Meeting

Accomplishments:
- Sprint #2 completed and release made with all manager side reports completed
- Customer side orders are now received by the database, although not apparent on site

Tasks Completed:

Task Description	Assigned to	Completed? (yes/no)
Begin Customer side user interface design, allowing customers of all personas to clearly view and select menu options	Joshua	Yes
Google Maps integration, begin creation of separate page to contact Spin N' Stone at the Memorial Student Center	Jeremy	Yes

Before The Next Meeting

Plans:
- Design plans to enable manager side to add new items and have them appear on both menus
- Finish customer side logic, manager side should new transactions decrementing the current inventory and each report reflecting these inventory changes

Task Assignments:

Task Description	Assigned to
Implement Customer side logic to decrementing inventory on the manager side based on the transactions submitted	Nathaniel
Display the ability to add new items on manager side so that they are apparent to a new customer looking on the menu	Chase

Minutes (Notes) from Previous Meeting

Having wrapped up our second sprint, the attention of Team Alpha turns to the Customer side and accessibility. After implementing the manager page reports, it was now clear that Spin N' Stone customers would need the ability to see new items managers include on the menu and that such orders would also be seen by the manager. Therefore, the first steps were decided upon, making sure manager visible inventories were updated and that new items the manager would add would be seen by the customer.
